

To whom it may concern:

This is a letter of recommendation for Mr. Francois REMY.

I have met Mr. REMY for the first time in 2011 as a student in Civil Engineering option Computer Science. I have been in contact with him first as a student representative to the Computer Science curriculum council, subsequently as a student in one of my classes, and finally as an internship trainee in industry for which I was the academic supervisor. In all of my contacts with him in this respect, he has imprinted upon me the features of an inquisitive and creative mind, a strong work ethic, and a keen intellect.

I have greatly appreciated in particular his strong involvement in the discussions concerning the Computer Science curriculum revisions where he was keen to signal problems in the daily organization of the program, and at the same time offer adequate solutions.

Academically speaking, Mr. REMY has passed his courses with flying colors, and his high grades mark him among the best of his class. Since all courses at the Master level are in taught English, I can vouch for Mr. REMY's proficiency in English.

Professionally speaking, Mr. REMY has shown evidence of excellent competences during a 12-week long internship at the Web development division of Adobe in San Fransisco, USA this year. Within the context of this internship, he has had the opportunity to work on three mid-scale web-related projects in various roles (prototype analyst and developer in a one-man project; developer in a large-team project). Adobe has in particular given very positive feedback on his creativeness; work-ethic; ability to work in teams and synchronize with other team members (even when they were located in other countries); and eye for detail and analysis. During this internhsip, Mr. REMY has also had the opportunity to interact with the web development teams of other major companies (notably Apple and Google).

I therefore support Mr. REMY's application and hope that you will give this excellent candidate a chance.

Sincerely,

prof. dr. Stijn Vansummeren
